欢迎 WELCOME

Sincerity & Innovation, Making Better!

Founded in 2004, Share Electronics Co., Ltd (SECL) is a professional manufacturer of electronic Transformer, Inductor, Coil, hardware and solutions. There are more than 200 employees servicing global customers.

We are committed to servicing customers with our wide selections of products, as well as our expertise to handle customer requirements.

We stand behind the products we sell. Our goal is to supply our valued customers with finest quality products, excellent technical support and customer service. We strive to provide top quality service and products.

发展历程 MILESTONE

Sincerity & Innovation, Making Better!

COMPANY
FOUNDED

We founded in Oct. 2004, and traded in transformer, coils, chokes, hardware ...

2004

FACTORY
SETTLED

We settled a factory making transformers, coils, chokes, in Zhuhai, China

2005

NEW
FACTORY

For the market increasing, we settled a new factory in Hunan. We also imported ERP system

2008

ISO9001
APPROVAL

To ensure the quality, we pass the ISO9001 certification and improve quality continuously.

2009

NEW
FACTORY

For market increasing, we move to a big and new place in Zhuhai, China

2016

CE/UL/TUV
APPROVAL

For the increasing market & customer request, some products got the CE/UL/VDE/TUV/KEMA certification

2017

NEW
PLAN

We plan to make power modules & Car chargers in 2018.

2018

公司理念 PHILOSOPHY

Sincerity & Innovation, Making Better!

WHAT MAKES SHARE DIFFERENT ?

There may be many reasons why a "Standard Component" is not the ideal solution - but then it's good to know that we would like to make special editions or new developments to offer the right solution.

Simple wishes for variants of output voltages, terminal locations, self-induction and the like, can often be met immediately.

But we also like to participate in complete development of completely new designs or components. This can include everything from the production of new injection molding tools, special approvals, new winding technologies, etc.

01

ISO 9001 Certified, CE Certified, Providing Quality, Cost-Effective, Reliable Solutions

02

Customer Service and Satisfaction Guaranteed

03

Strength, Stability, Service, Integrity

KEY POINT OF SHARE

If the product is to be used in large numbers, there are even more reasons for cooperation from the start with SHARE. There can certainly be advantages of this, which means that the product will get the very right design and cheapest price from SHARE.

SHARE can offer many designs. Those designs that can normally meet the wishes or requirements - but if necessary, we would like to customize or make new plastic tools for encapsulation, coil-molding and much more.

KEY POINT OF SHARE

We can offer that even custom-made transformers will be covered by approvals from UL, CSA, KEMA, etc., but we will be happy to assist you in implementing them. New approvals may be required.

Everything from the first trial series, new approvals, new plastic tools, special packaging and up to extremely high volume production are part of SHARE competence areas.

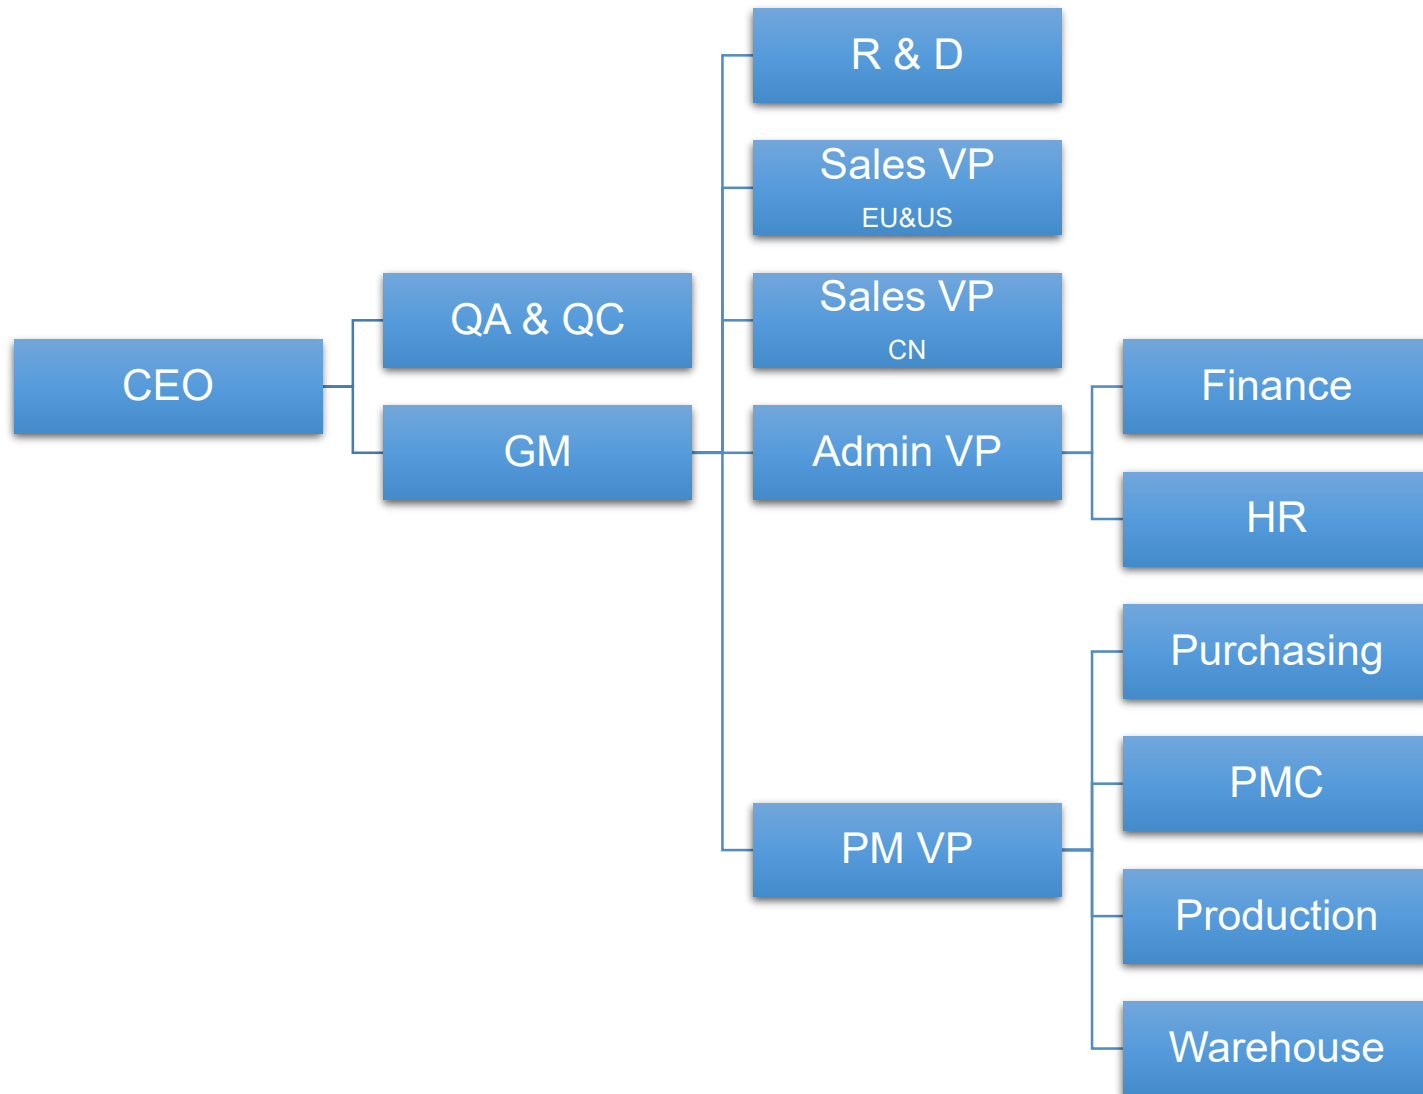

KEY POINT OF SHARE

Low power loss during idle is being increasingly focused. As required, different core materials and induction levels can be selected, both of which can affect both idle and full load loss quite significantly.

SHARE have that knowledge - and it will of course be used best when new products are designed.

品质保证 Quality Assurance

Sincerity & Innovation, Making Better!

QUALITY GUIDELINE

To meet all requirements of our customers, All of us implement Quality Assurance System continuously, Including providing excellent quality and perfect service, and delivering defect-free products on-time.

SUPPLIER CONFIRMATION

We have a process to search ,check ,confirm the suppliers ,we have a system to record the suppliers ,if the supplier can not meet our and customer's requirement, it will be cancelled from our supplier pool.

CUSTOMER SERVICE

We offer high quality, rapidly ,on time service, after get information from customers, for quality issue there will be a 8D report show what is the reason, how we will do, how to improve.

QUALITY CONTROL

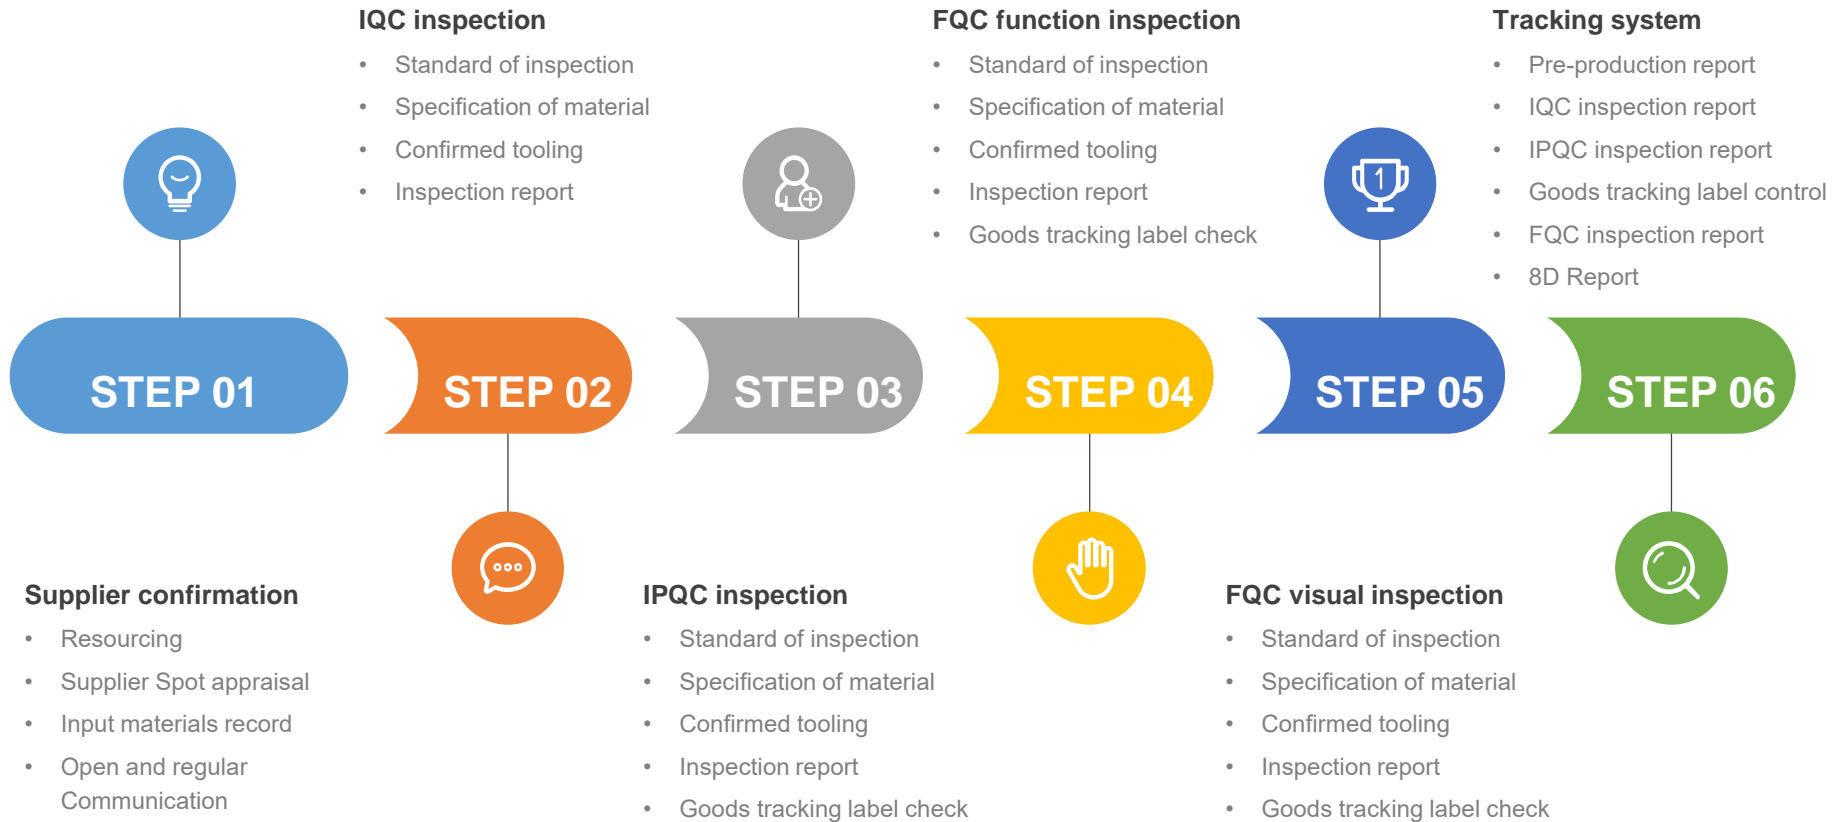

We settled IQC, IPQC, FQC, Final Visual inspection process in our factory, each process must be recorded in tracking system, we also requested the R&D must join the quality system. we need pre-production report before mass producing

TRACKING SYSTEM

There some card in our factory to tracking the produce process, like material come from which supplier, when coming into our factory, and which lot products use it, when it send to customers.
